

1 Write a program to find the largest and smallest element in an array

->

I/p

```
#include <stdio.h>
```

```
int main () {
```

```
    int n, i;
```

```
    int arr[100];
```

```
    printf("Enter number of elements:");
```

```
    scanf("%d", &n);
```

```
    printf("Enter elements:");
```

```
    for (i = 0; i < n; i++) {
```

```
        scanf("%d", &arr[i]);
```

```
    }
```

```
    int max = arr[0];
```

```
    int min = arr[0];
```

```
    for (i = 1; i < n; i++) {
```

```
        if (arr[i] > max)
```

```
            max = arr[i];
```

```
        if (arr[i] < min)
```

```
            min = arr[i];
```

```
    }
```

```
    printf("Largest element = %d\n", max);
```

```
    printf("Smallest element = %d\n", min);
```

```
    return 0;
```

```
}
```

O/p

Enter number of elements: 4

Enter elements: 6 7 9 6

Largest element = 9

Smallest element = 6

main.c

Share

Run

Output

Clear

```
1 #include <stdio.h>
2
3 int main()
4 {
5     int n, i;
6
7     printf("Enter array size: ");
8     scanf("%d", &n);
9
10    int arr[n]; // Variable length array (C99)
11
12    printf("Enter %d numbers: ", n);
13    for(i = 0; i < n; i++)
14    {
15        scanf("%d", &arr[i]);
16    }
17
18    int max = arr[0];
19    int min = arr[0];
20
21    for(i = 1; i < n; i++)
22    {
23        if(arr[i] > max)
24            max = arr[i];
25
26        if(arr[i] < min)
27            min = arr[i];
28    }
29
30    printf("Largest: %d\n", max);
31    printf("Smallest: %d\n", min);
32
33    return 0;
34 }
```

```
Enter array size: 4
Enter 4 numbers: 6
7
6
9
Largest: 9
Smallest: 6
```
